

# **BICESTER HEALTH CENTRE**

**Coker Close, Bicester, OX6 7AT**

**Telephone: 01869 249333**

**Trainer : Dr Helen Weaver.**

Bicester Health Centre is situated near the centre of the market town of Bicester in North Oxfordshire. We are a 6 partner practice and serve a population of approximately 11400 patients from Bicester town and the surrounding villages so we have a wide case mix to allow excellent experience in general practice.

We have been a training practice for many years and are totally committed to teaching and training. As well as training registrars we often also have medical students and students attached to other specialties within the primary health care team. We have a long association with the Banbury VTS scheme and the registrar is actively encouraged to participate in the teaching provided at the postgraduate centre at the Horton Hospital in Banbury.

The Health Centre has recently been modernised and updated providing a pleasant environment for patients and staff. We are fully-computerised and are a dispensing practice. The registrar has their own fully-equipped room. The primary health care team work from the Health Centre so there is good communication with other agencies. The community hospital, with in-patient beds, Xray, physiotherapy and occupational therapy, is located next to the Health Centre. The Health Centre has a full phlebotomy service and ECGs, spirometry etc can be carried out in-house. There is also a full range of chronic disease clinics and a nurse triage system in place.

The practice prides itself on its high standards of clinical care and works very hard to provide the best possible service to its population. We are a friendly practice and would be more than happy if you would like to come and visit.
